Mike Shufelberger of Shufelberger Construction built our home in 2004 and what I thought would be a modest "farm house" turned into my dream house. Not big-we are retired and didn't want a big house-but perfect! Mike found a draftsman to turn my sketches into an ideal home for us. What made it a dream house was the fine quality work that was done with special touches that made it unique and beautiful. His subcontractors and suppliers must adhere to his extremely high standards and if someone's work doesn't meet those standards he deals with it and the work is redone or the item replaced. Mike Shufelberger is the most honest, knowledgeable and conscientious builder you could ever have and my husband and I wholeheartedly recommend him to everyone who wants a fine custom home (or barn, or shop)!
